DELTA Qualitätsstahl GmbH

WE GENERATE ADDED VALUE

Statement of principles concerning environmental protection and occupational health and safety

At **Delta Qualitätsstahl**, environmental protection and occupational health and safety are integral parts of all corporate processes. The management team and all staff set a high standard of environmental protection and occupational health and safety as a core objective. Its improvement is a shared task of all corporate functions. Our customers associate our name with quality, punctuality and respect towards the environment and occupational health and safety. Within the company's processes, the management team sees itself as being committed to environmental protection and occupational health and safety without restrictions; these tasks have complemented our ongoing processes towards improved quality for years:

· DELTA only offers and supplies products which meet or exceed the customer's requirements and expectations in terms of quality, environmental protection and occupational health and safety.

· DELTA maintains a management system that ensures the efficient monitoring of all environmental and safety related processes and their effectiveness. This will be achieved through the common use and application of established quality management documentation and the body of instruments it entails.

· Using appropriate tools, DELTA has implemented a continuous improvement process for the environment, occupational health and safety (and quality), which encompasses preventive measures and accident prevention.

· DELTA promotes awareness of environmental protection and the occupational health and safety of all our staff through regular information and training events.

· DELTA even integrates environmental protection and occupational health and safety when the company comes to plan new equipment, activities, products and processes.

· DELTA analyses, evaluates and monitors the environmental, safety and health aspects of its activities on site.

· DELTA sets up programmes in order to minimise and continuously improve its environmental impact, safety risks and the consumption of resources.

· With the procedures it has established, DELTA is committed to a continuous improvement process.

· DELTA is committed to always adhere to the applicable legislation and other environmental requirements and, in many areas, the company shall go beyond the measures that are legally required.

· DELTA operates a policy of open communication with authorities, stakeholders, the public and its business partners concerning aspects related to environmental protection and occupational health and safety, as well as with regard to the company's activities and its consumption of resources.

· DELTA appeals to its contractors to apply advanced environmental protection / occupational health and safety procedures.

· In order to minimise the consumption of resources through new ideas and techniques, DELTA seeks dialogue with companies which / craftsmen who carry out important support tasks on site.

· DELTA cares about the indirect environmental impact caused by the inbound and outbound transportation of our products.

One particular challenge we face is to systematically train and teach all staff about the objectives of our management policy so that the goals we place can be achieved.

The management team
